**Fluorsid SpA**

2° strada Macchiareddu  
09032, Assemini  
Italy

Submission date: **28 May 2013**

Submission number: **LD407657-41**

Decision number: **SUB-D-2114252091-62-01/F**

**DECISION ON YOUR REGISTRATION UNDER REGULATION (EC) NO 1907/2006**

Dear Sir/Madam,

In accordance with Article 20(2) of Regulation (EC) No 1907/2006 ("the REACH Regulation"), the European Chemicals Agency (ECHA) has examined the completeness of your registration dossier for **Magnesium**. This registration by **Fluorsid SpA** covers:

- the tonnage band **between 100 and 1000 tonnes/year**

The registration was considered complete.

The registration number is: **01-2119537203-49-0076**

The registration date is: **28 May 2013**

This registration entitles you to manufacture/import the above-mentioned substance or, if relevant, to produce/import an article containing it, within the tonnage band(s) specified above.

If, however, you have been informed by ECHA that a previous registrant has requested an extension of your registration waiting period (in accordance with Article 27(8) of the REACH Regulation), you may start to manufacture/import the substance, or if relevant, to produce/import the article containing it, only after the expiry of 4 months from the date of notification of the present decision.

Please note that ECHA always informs registrants that:

- In accordance with Article 20(2) of the REACH Regulation, the completeness check ascertains that all the elements required have been provided and the fee payment has been made. However, this completeness check does not include an assessment of the quality or the adequacy of any data or justifications submitted. Such an assessment may occur later in a compliance check.
- In accordance with Article 22(1) of the REACH Regulation, registrants are on their own initiative required to update their registrations without undue delay with relevant new information and submit them to ECHA in the cases described in this provision (for instance, change in status, substance composition or quantities).
- Articles 11(1) and 19(1) of the REACH Regulation oblige registrants of the same substance to submit certain information jointly. This obligation applies to you and any other existing or future registrant of the same substance.

Note that, if your IUCLID dossier did not include an EC number in section 1.1, REACH-IT has automatically generated one because substances in dossier updates always have to be identified with the relevant EC number. In this case, before proceeding with an

20 June 2013

update dossier you have to export from REACH-IT the EC entry that has been created and import it into your IUCLID installation inventory. Failure to do so will result in your dossier being automatically rejected by the system. For detailed instructions on how to do this, please consult Data Submission Manual 4 available at <http://echa.europa.eu/web/guest/support/dossier-submission-tools>.

Also, please be aware that, in accordance with Article 119 of the REACH Regulation, certain information from this registration dossier will be published on the 'Registered substances' page on the ECHA website without further notice. For further information on the practical arrangements for inclusion of information from registration dossiers on the 'Registered substances' page, please consult the information published at <http://echa.europa.eu/web/guest/regulations/reach/substance-registration/publishing-information-from-dossiers>.

If you have a specific concern about the content of this letter you can contact the ECHA Helpdesk using the contact form at <http://echa.europa.eu/web/guest/contact>.

Yours faithfully,

Kevin Pollard
